

Home Pest Dust {or other product name}

CAUTION

Keep Out of Reach of Children

See additional Precautionary Statements on back panel

Active Ingredients:

Geraniol	8.4%
Cornmint Oil	0.1%

Inert Ingredients*	91.5%
Total	100.0%

*Diatomaceous Earth, Sodium Bicarbonate, Calcium Silicate and Calcium Carbonate

(Note: The Ingredients Statement maybe on the front or back panel; it must, however, be presented in this format.)

Net Contents: _____ oz (____ g)

Select from the following Pesticidal claims supported by the efficacy data:

Kills Bed bugs, Fire ants, Fleas (egg, larval and adult stages), German cockroaches, House flies, Pharaoh's ants and Ticks (nymph and adult stages).

Repels, for up to 11 weeks, Brown dog ticks and Cat fleas when applied at a rate of 5.5 oz to 12.8 oz/500 sq. ft.

Select from the following Marketing Claims:

Kill-and-repel dust formula

Proven effective against all stages of fleas – adults, larvae and eggs

Proven to repel fleas and ticks for up to 11 weeks

Season-long protection

Proven to kill ants, bed bugs, fleas, flies, roaches and ticks

No re-entry concerns

Fresh (or other descriptive term, such as "Pleasant") Scent

Pet Friendly

Contains no Pyrethrins or Sodium Lauryl Sulfate

No Known Resistance

Works on Resistant Species

DIRECTIONS FOR USE

Read entire label before use. Shake well before use.

Many pest species enter the building through exterior walls or relocate through interior adjoining walls. It is critical to properly treat these walls to kill these overwintering and trans-locating species. Treat walls by removing outlet and switch plate covers then puffing a light coating of dust into the wall voids behind the outlet boxes (not in the boxes themselves). This applies a layer of dust onto the tops of the electrical cables inside the walls, which is a common 'highway' for bugs to traverse. Also treat gaps around cracked interior and exterior window and door frames; this will allow dust to flow into the wall voids and cracks around the molding. These are common entrance points into a structure. Wipe away excess dust with a damp cloth to ensure your applications are inaccessible to future human/pet contact, but remain in the hiding places of the pests.

To control listed pests in your carpets and upholstery, uniformly apply powder over the entire surface. **Apply only to dry surfaces and do not wet powder.** Prior to general application test a small, inconspicuous area and check later for effects on color (staining) or texture. Apply in and around areas where insects may be crawling, hiding or living. The

amount to apply varies depending upon infestation severity. Suggested application rate is 1-2 oz per 100 sq ft of surface area. Apply more powder to areas where pets spend most of their time. Focus heavier treatments to areas where dogs land as they jump off beds and to higher elevation resting areas. Regularly dust pets' bedding, kennel and sleeping areas. Reapply every 2-11 weeks, as needed, to control infestation. May be used year-round to help reduce the occurrence of fleas and ticks. If powder adheres to a spot, immediately brush out and remove with a vacuum. Empty vacuum bag, outdoors, after each use. For added control, simultaneously treat pets with a flea and tick control product labeled for use on pets, before entry into treated areas.

Carpets: Brush lightly with a broom to force powder deep into carpet where fleas and their larvae exist. Wait at least one hour before lightly vacuuming to remove powder visible on carpet surface. For maximum efficacy, and when applying at lower rates, delay vacuuming for 24 hours.

Upholstery: Remove loose cushions. Sprinkle along creases and into corners. Use a brush to lightly work powder into folds and creases.

Carpet Edges and Furniture: Apply powder under the edges of carpeting around the tack strip that holds the carpet tight against the walls. For bed bugs, additional areas may be treated such as the cracks of bed frames, headboards and other furniture. Wipe away excess dust with a damp cloth to ensure your applications are inaccessible to future human/pet contact. Do not apply this product into electronic equipment (TVs, radios, computers, etc.).

PRECAUTIONARY STATEMENTS

May be harmful if swallowed. May cause slight eye irritation.

If in Eyes: Immediately rinse eyes with plenty of water, including under eyelids. **If on Skin:** Thoroughly wash with soap and water. **If Inhaled:** Move to fresh air. **If Swallowed:** Immediately rinse mouth and drink plenty of water. In all cases, if irritation persists, call a physician or 1-800-222-1222 for emergency medical treatment information.

Storage and Disposal: Keep away from children and pets. Store in original, tightly closed container in a cool, dry area. Non-refillable container; do not reuse or refill this container. Recycle empty container, or discard in trash.
