Eco-friendly way to kill large fire ant mounds

Kills Ants in 30 minutes

Complete Kill of Fire Ants in 3 Days

Kills Ants including Red Imported Fire Ants

Fast Knock Down

No Known Resistance

Works On Resistant Species

DIRECTIONS FOR USE

Read entire label prior to use and use product as directed. Shake well before use. Spray ants from a distance of 8-12 inches. Use 2-4 trigger sprayer pumps, depending upon pest pressure, and thoroughly wet ants, but not to the point of saturation/runoff.

Use outdoors in lawns and in areas around flower gardens, flower beds, mulch beds, perimeter areas of structures, foundations, fence lines and other areas where ants are observed. For best results, apply during morning or late evening during cooler weather (65°-80°F) when ants are most active. To treat ant mounds, use a stick to disturb the mound, making ants appear on the mound surface; then spray ants until wet. Before applying to outside perimeters of structures, rake back mulch, debris, and leaf litter to expose ground nesting areas.

PRECAUTIONARY STATEMENTS

WARNING: May cause allergic skin reaction.

Prevention: Avoid breathing mist/vapors/spray. Wear protective gloves.

Response: If on Skin: Wash with plenty of soap and water. If irritation or rash occurs, get medical advice/attention. Wash contaminated clothing before reuse. If irritation persists, call a physician or 1-800-222-1222 for emergency medical treatment information.

Storage and Disposal: Keep away from children and pets. Store in original, tightly closed container in a cool, dry area. Non-refillable container; do not reuse or refill this container. Recycle empty container, or discard in trash.
